Checker

Andy, Yu-Guang Chen
Associate Professor, Department of EE
National Central University
andyygchen@ee.ncu.edu.tw
Slides Credit: TA Ting-Yun Liu

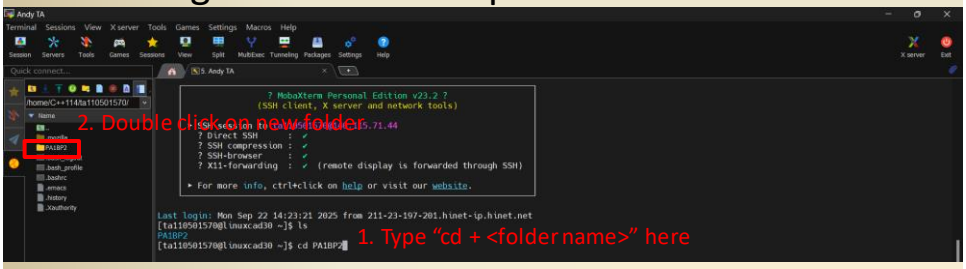

How to upload your file

◆Make a new folder to manage your files.

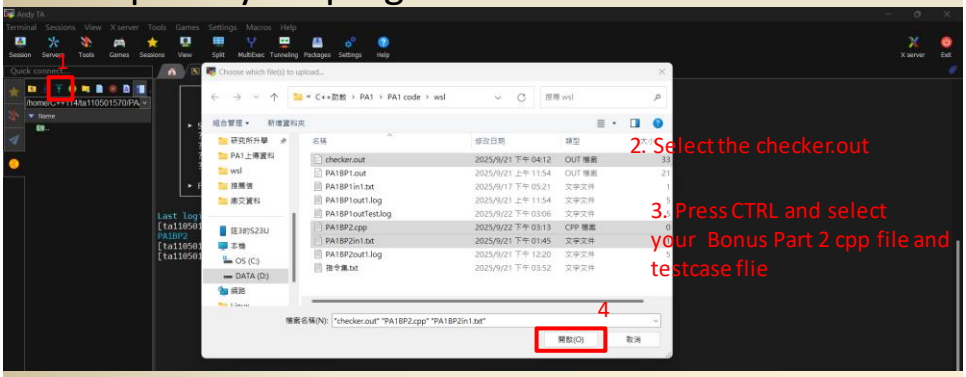

How to upload your file

◆Change the execution path to folder.

How to execute your program

◆Upload your program.

How to execute your program

◆Generate executable file(.out).

```
[ta110501570@linuxcad30 ~/PA1BP2]$ g++  -std=c++11 PA1BP2.cpp -o PA1BP2.out
```

◆Execute the executable file with a testcase and write a log file recording the output.

```
[ta110501570@linuxcad30 ~/PA1BP2]$ ./PA1BP2.out < PA1BP2in1.txt > PA1BP2out1.log
```

◆Test the time

```
[ta110501570@linuxcad30 ~/PA1BP2]$ time ./PA1BP2.out < PA1BP2in1.txt > PA1BP2out1.log
0.001u 0.003s 0:00.00 0.0%      0+0k 0+8io 0pf+0w
```

How to execute your program

◆Use the checker to check the correctness of your program's output log file.

```
[ta110501570@linuxcad30 ~/PA1BP2]$ ./checker.out PA1BP2out1.log PA1BP2in1.txt
```

◆If "Permission denied", run the following command. Then re-execute the checker.

```
[ta110501570@linuxcad30 ~/PA1BP2]$ chmod 700 checker.out
```

◆The correct message looks like:

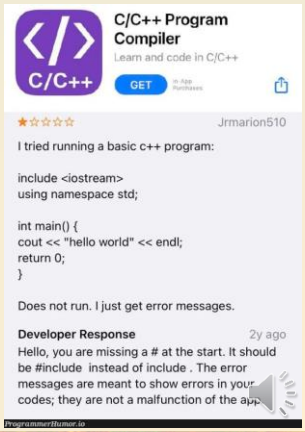

```
(V) Congratulations!!! You pass this testcase!
```

Warning

- Please ensure that the testcase you entered into your program is consistent with what you entered into the checker.

Wrong message

- File parameters / Open file error.
  - Lack of the log file or testcase file parameters while executing the checker.

Lack of .log file or .txt test file.

  - Cannot open the log file or testcase file.

Please check the log's file name you enter is correct and under the same folder of this .out checker.

Please check the testcase's file name you enter is correct and under the same folder of this .out checker.

Wrong message

- Obstacle code error, check out the testcase.
  - First layer.

Terminated by first layer obstacle code error.

  - Second layer.

Terminated by second layer obstacle code error.

Wrong message

- The error messages starting from this page indicate that your program has some bugs to fix, and will followed by:

(X) WRONG answer.

- Dinosaur died, should not happen.

The dinosaur died due to crash into an obstacle. The dinosaur should be able to stay alive till the end.

Wrong message

- Wrong message asking the player to enter a jumping command.

```
Error occurred when parsing command in line <#line>.
```

- You entered a wrong jumping command.

```
Wrong jumping command, it is not allowed.
```

- Typical wrong message, led by wrong dinosaur map or any wrong output message.

```
Wrong ans at line <#line>.
```

Q&A
